us there any made for four years afterone week, in our country than ever they ever enjoyed. At present oil manufactories in the canneldistricts of Virginia, Kentucky and Ohio, great quantity is now made in the neighf this city. The oldest factory of this in this region, is the kerosene-works whe eastern district of Brooklyn, on Long ad. It is certainly a wonderful place, both secont of the original method of distilling culs, and the vast extent of the premises. re years ago, a few pounds of coal, according the common methods, were here distilled in tall fashioned retorts, now there have been ed several rows of retorts, each of which mins 25 tons of coal and this amount is workof a huge pipe-bowl and when the coal is matte. The draft of the heated products in through the coal is effected by steam power, it the oil vapors that are carried off below are densed into crude-oil and pass from a conductpipe into a tank. The process is a strange ended; here steam is applied to a new pure certainly—that of "smoker" on a grand le for the production of oil for our lamps.
e operations are under perfect regulation to
ent the cannel coal undergoing combustion.
these works there is one of such retorts now be course of erection, which will be able to

gowing oil manufacture. - Sci. Am. SHIPPING OFFICE. TICE. - THE UNDERSIGNED.

ike 100 tons of coal at one operation and

loss per annum; and from this fact the pub-will be able to form some idea of our great

LE-Approved security given for the amount advanced to the nonlocation of the reef.
